Good day all,

Please go to;

<http://www.flickr.com/photos/johnclukerii/sets/72157624856775550/with/4948847712/>

If you could please go through this set and let me know if there are any factual errors. I'm going to go out on a limb and I want to make sure I'm not TOO far afield before I start publicizing it. I understand if some of you cannot comment, but, I wanted to make you all aware of what I'm going to be saying.

The SSMPA is working up a statement about the draft agreements. It will be along these lines. Stay tuned.

Thank you all for your help and encouragement.

Enjoy,
John Luker

John,

That you would blind copy me, and who knows who else, suggests plenty about how you operate. That you would posit that cleaning up SSFL to background would be bad because the place is so pretty suggests even more.

So as one of the bcc'd here, and as a reporter, let me ask you about this comment on one of the photos: *This Plant is in the Southern Buffer Zone. In an Oak Riparian Woodland, right across the creek from a spring that is known to be seeping TCE.*

A phrase comes to mind... "Over my dead body!"

Are you saying that you would fight to the death over this lovely stream even though it may be impacted by TCE? Are you saying that the draft DTSC agreement with DOE and NASA is a grave mistake because one has more chance of getting cancer from driving on the 405 freeway than being at an unremediated SSFL? Are you suggesting that there be no cleanup, or at least no cleanup in these lovely spots?

Also, note my open cc list here - I want to make sure that some folks see this because your opinions are important. In the interests of an open and inclusive discussion, would you "reply all" here and also tell us who was on your blind copy list?

Michael Collins
