I took this picture and YOU do NOT have the right to display it anywhere!
How dare you steal my photograph! After the efforts I made to take the photograph, to find it on your website is extremely upsetting to me. Take it down immediately!

Please respond to me in writing as soon as it is removed.
Thank you in advance.

The 'how-to' instructions on how to steal photographs is particularly troubling. Below, I follow the instructions to show another example of how the leader of the workgroup twists the work of others to suit his own political needs while bullying out any voices outside his own, and his pre-approved "yes people." I am sick of this behavior and everyone looking the other way. This is the only voice sponsored by our government while many other voices in the surrounding communities continue to be ignored as evidenced by recent events including another denial of a request to put the budget rider on the workgroup agenda. Here is another glaring example: look, don't look, it's up to you, but these photographs were taken by me, and I did not give him these photographs. How does he have the hi-res versions? Please explain how this is acceptable behavior that is the only sponsored community voice at the only meeting any legislators ever attend?
