Blast-off to the truth!
 Our community has waited too long for real investigation and clean-up!

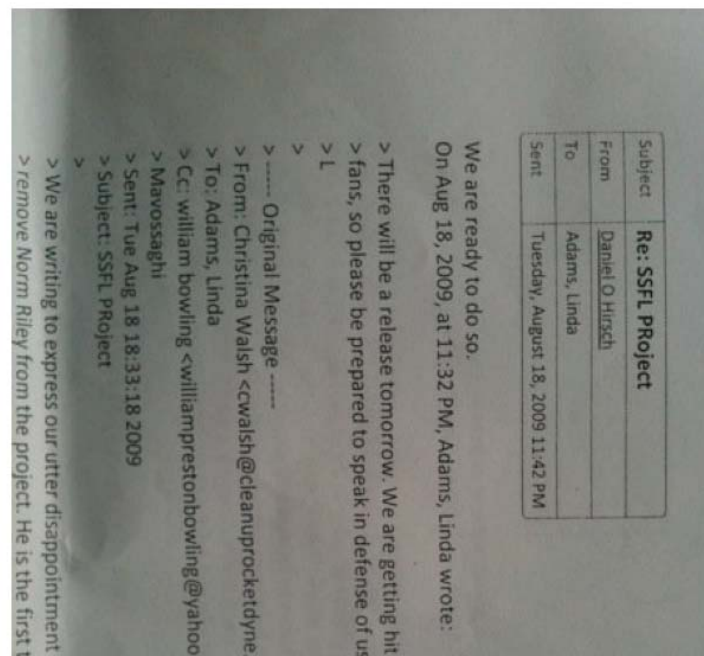

[Click here for the truth about the consent order](#)

The following documents are a result of a series of Public Records Act Requests filed with various members of the regulatory and legislative agencies. Many of these PRAs were ignored, and others were complied with, but specific documents were omitted. Many public officials feel that the public records act does not apply to them. What is the purpose, if it does not apply to elected officials and appointed members of our government?

Truth spans far and wide. I will be changing these every day so that you may begin to get a glimpse into what is really going on up in Sacramento, and in our own community as a result of interlopers from hundreds of miles away...

One of the most telling, is this one, where Secretary Linda Adams refers to me, Christina Walsh as "the Boeing Fans" based on the many meetings I have attended over many years, this statement is extraordinary in demonstrating that the CalEPA office of the Secretary is not remotely knowledgeable about the people or the issues. Just one voice.

Subject: urgent SSFL situation

Hi Linda,

Bill Craven and I would like to meet with you - privately and alone - on Tuesday or Wednesday if that is at all possible with your schedule. We need to speak with you carefully about a crisis regarding the Santa Susana Field Lab that is on the verge of blowing up. Please let us know if that will be possible.

Best wishes,

Dan

Hi Linda,

Out the release and draft Order. Talked to Ventura fiber researcher, heading the steps you announced today.

For some an initial run-through of the draft Order.

For advice even than I heard.

The Order would overturn every aspect of SSFL. Not an option would remain.

Everything that you ordered last year for the protection of the state was reversed in the worst regulations.

Quite a commitment as to how to do.

Out
